DETAILED ACTION

1. This in responsive to attorney's call on October 5, 2004.

Reasons For Allowance

2. The following is an examiner's statement of reasons for allowance:

Applicant's claimed invention distinguishes over the prior art for the following reasons.

The independent claims 1, and 6 are allowable over the prior art of record because none of the references, either alone or in combination, discloses or renders obvious in view of applicant's argument the clock skew optimization method for placement and routing of clock distribution circuits by selectively replacing first element with second element having common input capacitance, and (i) different driving capability, (ii) an opened output pin or (iii) capacitance element, until evaluated value of clock skew becomes equal to or smaller than a targeted clock skew value.

The independent claim 5 is allowable over the prior art of record because none of the references, either alone or in combination, discloses or renders obvious in view of applicant's argument the clock skew optimization method for placement and routing of clock distribution circuits-by selectively replacing first element with second element having different driving capability and equivalent input and output pin location until evaluated value of clock skew becomes equal to or smaller than a targeted clock skew value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
